

## WordPress Plugin Installation

The Slatwall Commerce for WordPress plugin will connect your WordPress installation with Slatwall via the [Slatwall API](#). The plugin will also install starter templates to get you up and running quickly.

1. Download the Slatwall Wordpress plugin from the [github repository](#)
2. Select **Plugins** > **Add new plugin**
3. Upload Slatwall zip file from github repository
4. Select **Activate Plugin**
5. Select **Slatwall** tab in sidebar navigation
6. Enter **domain url** and **access keys**

**API Settings**

**Basic Settings**  
Update basic store information

Access Key Secret:

## Storefront Pages & Templates

The Slatwall Wordpress plugin includes frontend eCommerce templates conveniently displayed by **shortcodes**. The code controlling these shortcodes can be found in the [plugin directory](#).

Create each storefront page below and add its shortcode: **Select Block > Widgets > Shortcode**

## Product Listing & Merchandising

1. Product Listing → **[product-listing]**
2. Product Search Form → **[product-search-form]**
3. Product Search Results → **[product-listing-search]**
4. Brand Listing → **[product-listing-brand]**
5. Category Listing → **[product-listing-category]**
6. Type Listing → **[product-listing-type]**
7. Custom Listing → **[product-listing products=""]**

*Note: Provide a comma delimited list of product codes for custom listing pages*

## Product Shopping & Commerce

1. Product Detail → **[product-details]**
2. Cart → **[shopping-cart]**
3. Checkout → **[checkout]**
4. My Account → **[my-account]**

Note: By default, a mini cart shortcode is available in the template header → **[mini-cart]**
